					--	4.7 (>3 ft bgs)	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	

Abbreviations:

-- = not analyzed/not applicable

<0.3 = not detected above the stated laboratory reporting limit

Gray and Bold = analyte reported above screening level

DTSC = Department of Toxic Substances Control

DTSC-SL = DTSC Screening Level

ESL = RWQCB Environmental Screening Level

ft bgs = feet below ground surface

HERO = Office of Human and Ecological Risk

ISM = Incremental Sampling Methodology composite sample

J = analyte positively identified; approximate concentration reported

J- = analyte positively identified; approximate concentration with negative bias reported

J+ = analyte positively identified; approximate concentration with positive bias reported

mg/kg = milligrams per kilogram

ND = non-detect; method detection limit not reported

RSL = U.S. EPA Regional Screening Level

RWQCB = Regional Water Quality Control Board

U.S. EPA = United States Environmental Protection Agency

Notes:

(a) Data collected in previous investigations were not confirmed with lab reports or validated.

(b) Metals analyzed by U.S. EPA method 6010B, with the exception of mercury, which was analyzed using U.S. EPA Method 7471A, and arsenic, which was analyzed by U.S. EPA Method 6020.

(c) DTSC Screening Levels (DTSC-SLs; Note 3 - DTSC HERO (2018)) for commercial/industrial soil. DTSC-SLs applied when available.

(d) U.S. EPA Region 9 (2018) Regional Screening Levels (RSLs) for industrial soil. RSL shown and applied only when DTSC-SL was not available.

(e) The screening levels for maintenance workers were estimated using U.S. EPA's online RSL calculator for outdoor workers and exposure assumptions discussed in the text. The toxicity data for chemicals listed in DTSC's *Human Health Risk Assessment Note 3* (DTSC HERO, 2018) were used as needed.

(f) RWQCB (2016) Environmental Screening Levels (ESLs) for soil for construction workers.

(g) Based on site-specific background concentrations for arsenic established using ISM sampling in fill (0-3 ft bgs) and native material (>3 ft bgs). Background concentration >3 ft bgs only applies to native materials, therefore 0-3 ft bgs screening level compared to soil stockpile data that was >3 ft bgs (Geosyntec, 2017).

(h) The screening level for arsenic is not shown because it is below the established background concentrations for the site.

Abbreviations:

-- = not analyzed/not applicable

<1 = not detected above the stated laboratory reporting limit

Gray and Bold = Analyte reported above screening level

Gray and Italicized = Analyte not reported above MDL; which was elevated due to matrix interference

DTSC = Department of Toxic Substances Control

DTSC-SL = DTSC Screening Level

ESL = RWQCB Environmental Screening Level

ft bgs = feet below ground surface

HERO = Office of Human and Ecological Risk

ISM = Incremental Sampling Methodology composite sample

J = Analyte was positively identified; approximate concentration reported

MDL = method detection limit

mg/kg = milligrams per kilogram

MTBE = methyl tert-butyl ether

ND = non-detect; method detection limit not reported

PAHs = polycyclic aromatic hydrocarbons

SGC = Silica Gel Cleanup

RSL = U.S. EPA Regional Screening Level

RWQCB = Regional Water Quality Control Board

TPHg, d, mo = total petroleum hydrocarbons in the gasoline, diesel, and motor oil ranges

U.S. EPA = United States Environmental Protection Agency

VOCs = volatile organic compounds

Notes:

(a) Data collected in previous investigations were not confirmed with lab reports or validated.

(b) DTSC Screening Levels (DTSC-SLs; Note 3 - DTSC HERO (2018)) for commercial/industrial soil. DTSC-SLs applied when available.

(c) U.S. EPA Region 9 (2018) Regional Screening Levels (RSLs) for industrial soil. RSL shown and applied only when DTSC-SL was not available.

Values shown for TPHg, TPHd, and TPHmo are based on the RWQCB (2016) Environmental Screening Levels (ESLs) for soil for commercial/industrial workers.

(d) The screening levels for maintenance workers were estimated using U.S. EPA's online RSL calculator for outdoor workers and exposure assumptions discussed in the text.

The toxicity data for chemicals listed in DTSC's *Human Health Risk Assessment Note 3* (DTSC HERO, 2018) were used as needed.

Values shown for TPHg, TPHd, and TPHmo are based on the RWQCB (2016) Environmental Screening Levels (ESLs) for soil for construction workers multiplied by a factor of 25 to match the exposure assumptions of maintenance workers.

(e) RWQCB (2016) Environmental Screening Levels (ESLs) for soil for construction workers.

Abbreviations:

"--" = not analyzed/not applicable

<3.3 = not detected above the stated laboratory reporting limit

Gray and Bold = Analyte reported above screening level

Gray and Italicized = Analyte not reported above MDL; which was elevated due to matrix interference

DTSC = Department of Toxic Substances Control

DTSC-SL = DTSC Screening Level

ESL = RWQCB Environmental Screening Level

ft bgs = feet below ground surface

HERO = Office of Human and Ecological Risk

ISM = Incremental Sampling Methodology composite sample

J = Analyte was positively identified; approximate concentration reported

MDL = method detection limit

mg/kg = milligrams per kilogram

ND = non-detect; method detection limit not reported

PCBs = polychlorinated biphenyls

RSL = U.S. EPA Regional Screening Level

RWQCB = Regional Water Quality Control Board

U.S. EPA = United States Environmental Protection Agency

TABLE 3
ANALYTICAL RESULTS FOR ANTI-STAIN AGENTS AND PCBs IN SOIL

Crescent Mills Industrial Site
Crescent Mills, California

Notes:

- (a) Data collected in previous investigations were not confirmed with lab reports or validated.
- (b) DTSC Screening Levels (DTSC-SLs; Note 3 - DTSC HERO (2018)) for commercial/industrial soil. DTSC-SLs applied when available.
- (c) U.S. EPA Region 9 (2018) Regional Screening Levels (RSLs) for industrial soil. RSL shown and applied only when DTSC-SL was not available.
- (d) The screening levels for maintenance workers were estimated using U.S. EPA's online RSL calculator for outdoor workers and exposure assumptions discussed in the text.
The toxicity data for chemicals listed in DTSC's *Human Health Risk Assessment Note 3* (DTSC HERO, 2018) were used as needed.
- (e) RWQCB (2016) Environmental Screening Levels (ESLs) for soil for construction workers.

TABLE 5
ANALYTICAL RESULTS FOR TPHg AND VOCs IN GROUNDWATER
Crescent Mills Industrial Site
Crescent Mills, California

Sample Location	Duplicate Sample	Sample Date	U.S. EPA Method 8260B (mg/L) (a)	
			TPHg	VOCs
SB-1		2/8/2017	--	ND
	X	2/8/2017	--	ND
SB-3		2/8/2017	--	--
SB-4		2/7/2017	--	--
	X	2/7/2017	--	--
SB-5		2/6/2017	--	ND
SB-6		2/6/2017	--	ND
SB-7		2/7/2017	--	ND
SB-8		2/7/2017	--	ND
SB-9		2/7/2017	--	ND
SB-10		2/7/2017	--	ND
SB-12		2/7/2017	--	ND
SB-13		2/6/2017	--	--
SB-14		2/8/2017	<15	ND
	X	2/8/2017	<15	--
SB-15		2/6/2017	<15 J	ND
LP-B01		8/27/2014	<50	ND
	X	8/27/2014	<50	ND
LP-B03		8/27/2014	<50	ND
LP-B03	X	8/27/2014	--	--
DP1		12/13/2002	<50	ND
DP2		12/13/2002	<50	ND
DP3		12/13/2002	--	--
DP4		12/13/2002	<50	ND
DP5		12/13/2002	<50	ND
HA3		12/13/2002	<50	ND
HA6		12/13/2002	<50	ND

Abbreviations:

-- = not analyzed/not applicable

<50 = not detected above the stated laboratory reporting limit

J = Analyte was positively identified; approximate concentration reported

mg/L = milligrams per liter

ND = non-detect

TPHg = total petroleum hydrocarbons in the gasoline range

VOCs = volatile organic compounds

Notes:

- (a) Data collected in previous investigations were not confirmed with lab reports or validated.
