

## Position Announcement Collaborative Forestry Technician

**Location:** Taylorsville, CA - with project work on the Lassen National Forest Almanor Ranger District

**Season Dates:** August to November (*season dependent on weather conditions; start/end dates may be flexible for those with scheduling conflicts*)

**Compensation:** \$18-\$21/hr (commensurate with experience)

**Benefits:** paid sick, holiday, and wildfire mitigation leave

### Position Description

The Sierra Institute for Community and Environment (Sierra Institute, SI), in cooperation with the Lassen National Forest (LNF) Almanor Ranger District (ARD) is hiring Collaborative Forestry Technicians to perform forestry work related to timber management and restoration treatment implementation. Technicians will work in cooperation with SI and ARD staff to implement timber sale and restoration treatment preparation work including unit boundary marking, and marking of green and salvage (burned) timber. Forestry Technicians will operate under the direction of SI office support staff and partners from the ARD. Work objectives will be derived from treatment and management goals and will follow prescriptions developed for specific project areas. **This is a unique opportunity to advance pivotal collaborative forest and watershed restoration projects that aim to protect rural communities from catastrophic wildfire and restore Sierra meadows.**

Forestry Technicians will advance their knowledge of Sierra Nevada mixed-conifer forest ecosystems, technical forestry, and collaborative forest management processes as well as standard procedures and practices employed by the USFS. Forestry Technicians will help assess progress towards objectives, monitor/ mitigate safety concerns in the field, and create a collaborative work environment that encourages professionalism, learning, and efficiency. They will receive project-specific training on tree-species identification, marking methodology, standard cruising methods, and forest pathology/ demography.

The majority of project work will occur within the boundary of the recent Dixie Fire (2021) and objectives will support several projects in various stages of implementation. The Dixie Fire burned with mixed severity across much of the Almanor Ranger District and the Forestry Technicians will experience a diverse and beautiful fire affected landscape while working in the field. Daily work may include but is not limited to: timber sale unit boundary marking in fire-affected timber sales, timber marking and cruising, and burn severity assessment/ data collection - essential work for advancing restoration priorities of regional partners and preparing forested ecosystems to be resilient to future changes in climate and fire regime.

Forestry Technicians must be organized, open to learning, possess the ability to motivate and support their coworkers and be willing to work hard in a physically demanding role. This position requires hiking while carrying a heavy pack and paint while mitigating known and unforeseen hazards such as smoke, heat, cold, and strong wind. This position will utilize a 4-10 work schedule consisting of four 10-hour days followed by three days off.

### Qualifications

#### Required

- Progress towards a degree or certificate in Forestry, Natural Resource Management, Ecological Restoration or related field(s), OR equivalent work experience in forestry or conservation (e.g. timber

P.O. Box 11 | 4438 Main Street | Taylorsville, CA 95983

(530) 284-1023 **Fax**

*Promoting healthy and sustainable forests and watersheds by investing in the well-being of rural communities and strengthening their participation in natural resource decision-making and programs.*

marking, logging, wildland firefighting, botany, wildlife, etc.);

- Experience with standard forestry field techniques, timber marking/ cruising, and ecology and natural systems of the Sierra Nevada;
- Ability to use compasses, topographic maps, and handheld GPS units or tablets to navigate and collect data in the field;
- Good physical conditioning to work and walk in the forest all day carrying day-packs with equipment during all types of weather;
- An ability to bring adaptability and improvisation, critical thinking skills, creativity, and humor to the workplace;
- Ability to be punctual, diligent, and thorough in their work and support a similarly strong work ethic amongst fellow staff members;
- Possess a valid, clean, state-issued driver's license, with an ability to safely operate a 4WD vehicle;
- Full COVID vaccination status (vaccinated and boosted).

### **Preferred**

- Bachelor's degree, Associates degree, or professional certificate in Forestry, Natural Resource Management, Ecological Restoration or related field(s);
- Experience working as part of a field crew or team, experience with safety management, and experience collecting and managing field data;
- Familiarity with mixed conifer forests and the ability to identify common tree species in the northern Sierra Nevada and southern Cascades;
- Current first aid or wilderness medical training certification (e.g., WFA, WFR, WEMT).

*Skills or experiences that can fill in for qualifications will be considered.*

***We invite all interested parties to apply including those belonging to Tribal communities, women, POC, and LGBTQ+ persons.***

### **Compensation**

Compensation is \$18 - \$21 per hour commensurate with experience. Health benefits through Sierra Institute are not available for this position, but may be obtained through Covered California (<http://www.coveredca.com/>). Field staff will be provided monthly sick time, paid holidays, and a set number of paid wildfire mitigation leave. Paid wildfire mitigation leave is intended to mitigate work days impacted by wildfire and smoke.

Necessary training will be provided tree-species identification, marking methodology, standard cruising methods, and forest pathology/ demography.

### **About the Sierra Institute**

The Sierra Institute promotes healthy forests, watersheds, and communities by investing in the well-being of rural communities and strengthening their participation in natural resource management. Our work supports initiatives that simultaneously benefit the environment, economy, and equity within a given landscape. Sierra Institute is located in Taylorsville, CA (population 154), and lies within an area referred to as "Indian Valley" that includes the communities of Greenville and Crescent Mills. Indian Valley offers uniquely rural community events and is surrounded by public lands including Plumas and Lassen National Forests.
