

Position Announcement Biological Technician (Wildlife)

Location: Mineral, CA - with project work in Lassen Volcanic National Park

Season Dates: September - October (*season dependent on weather conditions; start/end dates may be flexible for those with scheduling conflicts*)

Compensation: \$18.50/hr (commensurate with experience) and potential for housing at Park Headquarters

Benefits: paid sick, holiday, and wildfire mitigation leave

Position Description

The Sierra Institute for Community and Environment (Sierra Institute), in cooperation with Lassen Volcanic National Park (LAVO), is hiring one Biological Technician (Wildlife) to work with and assist the LAVO Wildlife Biologist in all tasks associated with wildlife inventory and monitoring in the park. The work will include specific tasks such as conducting surveys for California Spotted Owl, Northern Goshawk, and American pika, installing and maintaining remote cameras for wildlife monitoring, and assisting with operation of the parks Monitoring Avian Productivity and Survivorship (MAPS) bird banding station. This position may also assist with small mammal trapping on occasion. Other duties may include bear hazing and public education and assisting other programs within the Resource Management Division as needed. This is a great opportunity to learn about the wildlife species that inhabit the park and surrounding areas while honing wildlife identification skills through hands-on assessment and capturing of birds and small mammals. The applicant should be capable of hiking up to six miles daily while carrying a pack weighing up to forty pounds.

The position offers a unique opportunity to visit a large area of the park and includes work in some of the most sensitive and beautiful areas within its boundaries. The Biological Technician (Wildlife) may also participate in similar activities to advance other collaborative restoration projects in Plumas and Lassen Counties. There will be opportunities to join other resource management crews and gain experience in numerous other tasks. This position is part of an exciting partnership between Sierra Institute for Community and Environment and Lassen Volcanic NP to complete a variety of important Wildlife monitoring activities.

Responsibilities

Implementation

The incumbent works as a team member to safely conduct surveys for wildlife. Conducting surveys and monitoring wildlife is important to ensure wildlife populations remain unimpaired for future generations. This project will provide an incredible opportunity for the incumbent to gain critical skills that may lead to future work in national parks throughout the western US. The position is considered a developmental opportunity and will train the individual in proven and common methods of wildlife inventory and monitoring.

Operations and Safety

The work required of the incumbent involves objective hazards. The incumbent is expected to practice

Promoting healthy and sustainable forests and watersheds by investing in the well-being of rural communities and strengthening their participation in natural resource decision-making and programs.

situational awareness, directly addressing and/or raising safety concerns as they arise. Training will be provided to ensure the incumbent's ability to safely execute job functions.

Qualifications

Required

- Minimum of a high school diploma with educational, professional, or volunteer experience in natural resource management, wildlife conservation, or related fields;
- Must be 18 to apply;
- Demonstrated interest in wildlife or other natural resource management, this may include but is not limited to biological research and survey work, land conservation, wildland fire, etc.;
- Ability to perform physically taxing work in all weather conditions in rugged mountainous environments (i.e hike 6+ miles a day with a 40lb pack);
- Knowledgeable and proficient in backcountry travel;
- Sufficient equipment to perform the work, including sturdy shoes and appropriate clothing for a range of environments;
- Good communication skills to effectively interact with the public and co-workers;
- Interest in, or familiarity with, principles of wildlife management, forestry, or botany;
- A valid driver's license and access to reliable transportation;

Preferred

- Bachelor's degree, Associates degree, or professional certificate in Forestry, Natural Resource Management, Ecological Restoration or related field(s);
- Experience working as part of a field crew or team, experience with safety management, and experience collecting and managing field data'
- Knowledge of, or familiarity with wildlife and wildlife identification (using field guides) in California or other western states;
- Any current wilderness medical training certification (e.g., WFA, WFR, WEMT);
- Leave No Trace or other backcountry ethics training;
- Interest in, or familiarity with, wildlife species of the southern Cascades;

Skills or experiences that can fill in for qualifications will be considered.

We invite all interested parties to apply including those belonging to Tribal communities, women, POC, and LGBTQ+ persons.

Compensation

Compensation is \$18.50 per hour. Health benefits through Sierra Institute are not available for this position, but may be obtained through Covered California (<http://www.coveredca.com/>). Field staff will be provided monthly sick time, paid holidays, and a set number of paid wildfire mitigation leave. Paid wildfire mitigation leave is intended to mitigate work days impacted by wildfire and smoke.

Housing may be available for a fee in Mineral, CA at the Lassen Volcanic NP headquarters.

About the Sierra Institute

The Sierra Institute promotes healthy forests, watersheds, and communities by investing in the well-being of rural communities and strengthening their participation in natural resource management. Our work supports initiatives that simultaneously benefit the environment, economy, and equity within a given landscape. Sierra Institute is located in Taylorsville, CA (population 154), and lies within an area referred to as “Indian Valley” that includes the communities of Greenville and Crescent Mills. Indian Valley offers uniquely rural community events and is surrounded by public lands including Plumas and Lassen National Forests.
